Office Action Summary

Art Unit: 2829

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

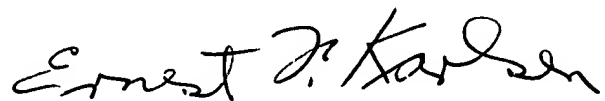

2. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over any one of

Janko et al, Nelson, Cole et al, Self or Kanamori.

3. Looking at Janko et al, for example, chip/package 10 has leads 12 that connect to surface runs 4. In Janko et al pads ²²~~20~~ at one end of a flexible circuit 20 are connected to leads 12 and the opposite end of the flexible circuit is connected to a test instrument. It is considered obvious to display the output of the test instrument. The type of connector used, the type of display used and the parameter tested are all considered matters of choice.
